

Trusted by the Best

Does your Disk Encryption Software:

- Integrate with smart cards, tokens and PKI at pre-boot?
- Adhere to open Industry Standards such as PKCS#11?
- Provide versatile key labelling to share encrypted files, disks, removable media?
- Offer enterprise wide key management without the "Master Password" vulnerability?

WinMagic's SecureDoc™

is the answer!

PASSWORD

Features:

- Full disk encryption
- Transparent operation
- Small to large scale deployment
- File Encryption and File Wipe.

NEW
FEATURES

Biometrics: SecureDoc now available with 3-factor authentication:
Password + Smart card + Fingerprint scan

3 in 1 Computer: Compartmental SecureDoc allows data of different levels of security to be kept completely separate and secured on a single computer. Enforced by cryptography, we believe Compartmental SecureDoc is the first software-only solution of its kind, enabling a laptop PC to be a cost effective solution for home/work, sensitive/less sensitive, or more levels of Secure Computer.

Pioneer in the Disk Encryption technology, WinMagic has achieved

- First AES validation from NIST
- Common Criteria validation
- First and only FIPS 140-1 Level 2 certification
- The only disk encryption (FORTEZZA version) certification by the NSA for SECRET data for US Government agencies

SecureDoc™

= SECURITY AND CHOICE

DISK ENCRYPTION

Testimonials

"I evaluated several vendors and was overwhelmed by the performance, ease of use, and level of security your product provided. The centralized management really makes a difference! Thanks again."

Michael Scott, Manager, Network Infrastructure and Security, Witness Systems, Inc., Roswell, Georgia, USA

"We have spent considerable time to evaluate disk encryption products for integration with our VPN solution for mobile professionals – Thales Trusted VPN. Based on a very strict evaluation focusing on fulfillment of a combination of requirements to international security standards, functionality, user-friendliness and price, we decided to go for WinMagic's SecureDoc. We are now able to offer our customers an even more complete security solution for mobiles users and home offices."

Nils Klippenberg, Director e-Security, THALES Communications, Oslo, Norway

"SecureDoc's sector based encryption is smart. It sits at the lowest level and intercepts all requests to read and write to the disk, so the entire disk is encrypted and no sectors are missed. With strong, trusted encryption algorithms, SecureDoc has a clean design."

Bruce Schneier, world renowned cryptographer, author of "Applied Cryptography", CTO of Counterpane Internet Security, Inc., Cupertino, California, USA

Awards

- Recipient of the Editor's Choice Award from Network Computing, Sept. 2002. SecureDoc raises the bar, gets an A and leaves competition products far behind with scores of C and D
- Recipient of the Reader's Choice Award for Best Security Products from Windows & .NET Magazine, Encryption/Digital Signing Software category, Sept. 2002
